Author reconstruction: source summaries and full raw experiments
100–400 nominal kPa
100–800 warm nominal kPa
Source selected layers
Source unselected layers
Raw-test OLS reconstruction
Two-stage WLS reconstruction
Cohesion intercept (kPa)
Friction coefficient μ
Measured mean temperature (°C)
Error bars reproduce untyped source '_error' columns; they are not local prediction intervals. −0.5°C summaries do not exactly reproduce.
